Общая информация

Rare find! Situated on the outskirts of Konare village, this property is surrounded by open hayfields and set apart from other houses — perfect if you're looking for peace and tranquillity, but still want to remain close to the coast and have facilities within easy reach.
Get away from the stressful times we're living through, for a super low price!

Are you looking for a property that stands by itself, immersed in beautiful nature, yet not far from modern conveniences? One with the potential to be developed into a charming holiday home?

Plum Tree Cottage is that property. Surrounded by hayfields and with no near neighbours, it offers a rare opportunity in rural Bulgaria, where most homes are found in close-knit village settings.

Accessed by a short track from the public road, the property enjoys lovely open views and is sheltered by a variety of mature fruit trees, sitting on a generous plot of over 1500m2.

Redevelopment works have already begun, but due to a change in personal circumstances, the seller is unable to complete the project. Improvements so far include raising the ceiling height, adding an extension, and replacing all floors with new solid concrete bases. A new, modern electric has been connected to and a new sceptic tank with plumbing up to the house has been installed.

A detailed visual plan and video are available to show how the finished project could look — please contact us for a link.

Plum Tree Cottage lies on the edge of Konare village, between the town of General Toshevo and the seaside resort of Kavarna. It's just a 25-minute drive to the Black Sea coast and its modern amenities.
